Gold Coast 22<sup>ND</sup>

**Dr. Olree has a Bachelor of Science in Human Biology, and a Doctor of Chiropractic, and run a family based practice located in Hillman, Michigan since 1981. His research into the biological role of trace minerals in all living things led to his development of The Olree Biological Periodic Chart. An analysis of his chart is the basis for his original cutting-edge book, Minerals for the Genetic Code, written in 2006. Besides his chiropractic practice, Dr. Olree established a health food store called Hillman Health Foods in 2001 so that he can offer his patients quality nutritional supplements. He travels teaching about the wonderful benefits of understanding, obtaining, and eating healthy food.**
